

CEU Categories

A= Attend C= Additional Certifications T= Teaching
J= Judging S= Special

A.1.1 Attending an Educational Short Course, Seminar or Technical Conference.

These can be sponsored by local, state, regional or national irrigation or green industry associations or societies, universities, colleges or technical institutes, federal or state agencies, manufactures, distributors, or professional associations and businesses. One hour of training equals one (1) CEU for irrigation related (as determined by the intent of Chapter 89G) programs. Indirectly related programs will be awarded one half (0.5) CEU for each contact hour with a maximum of four (4) CEUs from indirectly related programs that can be used for any one year renewal. An hour of training is a minimum of a 50 minute class. Refreshment and meal breaks are not considered training time.

A.1.2 Attending Irrigation and Green Industry Trade Shows, Field Days and Tours.

These can be conducted by local, state, regional, or national associations or societies, universities, colleges or technical institutes, federal or state agencies, and green industry organizations. 0.25 CEU per hour of attendance. Maximum of two (2) CEUs used for any one year.

C.1.3 Attaining Additional Certifications.

Credit for receiving additional certifications either at another level or in another specialty will earn ten (10) CEUs per examination successfully completed. Examples of this would be CIC, CID, CLIA, CGIA, CWLM-L, CAIS or CLT – Irrigation.

C.1.4 Completing an Irrigation or Business Course from a University, College or Technical Institute Outside of a Degree.

Completion of an irrigation or business course through class attendance or on line will be awarded three (3) CEUs per credit hour.

J.1.5 Judging at an Irrigation Competition

These can be sponsored by local, state, regional or national irrigation or green industry associations or societies, universities, colleges or technical institutes or federal or state agencies. Judging will be awarded one half (0.5) CEU per hour of judging. Maximum of two (2) CEUs used for any one year.

T.1.6 Teaching at an Irrigation Short Course or Seminar.

These can be conducted by state, regional or national associations or societies, universities, colleges or technical institutes, federal or state agencies or green industry organizations. One (1) CEU per hour of instruction. Even though an instructor might teach the same material several times in different locations, credit is given each time the material is presented.

T.1.7 Teaching an Irrigation Course at a University, College or Technical Institute.

All regularly scheduled semester or quarter type irrigation courses are included. CEU credit is listed for the first time an instructor teaches the course. For each subsequent teaching of the course half the number of CEUs are earned. A maximum of eight (8) CEUs can be used each year.

Credit Hours	Semester	Quarter
1	10	7
2	20	14
3	30	21
4	40	28
5		35

T.1.8 Teaching an In-House Irrigation Training Course of Green Industry Training Course.

These courses will normally be conducted by irrigation industry manufacturers, distributors, dealers or a licensed irrigation contractor for their individual company. The course outline must be submitted in advance. One (1) CEU for each hour of instruction.

A.1.9 Attending an In-House Irrigation Training Course of Green Industry Training Course.

These courses will normally be conducted by irrigation industry manufacturers, distributors, dealers or a licensed irrigation contractor for their individual company. The course outline must be submitted in advance. One (1) CEU for each hour of instruction.

A.1.10 Attending Business Courses or Seminars.

A minimum of two (2) CEUs are required in this category each year. Attending a business or industry related course or seminar that is directly related to the management of your business. One (1) CEU will be awarded for each contact hour with a maximum of four (4) CEUs used in any one year.

S.1.11 Items for Which the CEU Committee will determine Credits to be Awarded.

Presenting an irrigation paper to local, state, regional or national irrigation or green industry associations or societies, universities, colleges or technical institutes, federal or state agencies or professional associations. Writing irrigation books or sections of irrigation books, writing irrigation articles for professional publications or magazines, writing reference manuals, questions for certification examinations or serving as a board member in the irrigation or green industry. Taking an irrigation or business course not sponsored by a university, college online.
