## RQ Irrigation assocation CERTIFICATION PROGRAM Certified Irrigation Contractor Examination Equations

Basic and non-irrigation equations and conversions are assumed to be known by candidates. All citations refer to Landscape Irrigation Contractor, Irrigation Association. Oct. 2014. The equations are presented in the latest IA format and may appear different from those presented in the reference material.

1 cubic foot of water $=7.48$ gallons
1 acre-inch $=27,154$ gallons
1 acre-foot $=325,848$ gallons
